Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-18, drawn to transmitting position data to a remote server by a vehicle mounted device including short range wireless communication system, classified in class 701, subclass 207.
 - II. Claims 19-25, 35 drawn to communication system with a set data transmission interval, classified in class 701, subclass 36.
 - III. Claims 26-33, drawn to communication system with user input configuration at the remote server, classified in class 715, subclass 735.
 - IV. Claim 34, drawn to communication system with overwrite capability, classified in class 369, subclass 13.16.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions group I and group II-IV are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct if they do not overlap in scope and are not obvious variants, and if it is shown that at least one subcombination is separately usable. In the instant case, subcombination groups II-IV has separate utility such as reporting data at triggering of an event, user interface system that allows user to remote configure a communication system, and system with data management. See MPEP § 806.05(d).

The examiner has required restriction between subcombinations usable together. Where applicant elects a subcombination and claims thereto are subsequently found allowable, any claim(s) depending from or otherwise requiring all the limitations of the allowable subcombination will be examined for patentability in accordance with 37 CFR 1.104. See MPEP § 821.04(a). Applicant is advised that if any claim presented in a continuation or divisional application is anticipated by, or includes all the limitations of, a claim that is allowable in the present application, such claim may be subject to provisional statutory and/or nonstatutory double patenting rejections over the claims of the instant application.

3. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

According to the 37 CFR 1.176:

- a. The added claims 19-35 are held as constructively non-elected and withdrawn from consideration.
- b. Claims 1-18 which were presented in the original patent claims is herein treated on the merits.
- c. If the original claims are found allowable, and a divisional application has been filed for the non-elected claims, further action in the application will be suspended pending resolution of the divisional application.

Claims 1-18 are, therefore, treated on the merits in this reissued application. The following action addresses claims 1-18 only.

Ex Parte Quayle

4. This application is in condition for allowance except for the following formal matters:

In the specification:

The "CROSS REFERENCE TO COPENDING APPLICATION" should disclose that the application is a reissue of application 09/780,195 which claims priority from Provisional Application 60/181,887.

Allowable Subject Matter

5. Claims 1-18 are allowed.
6. The following is an examiner's statement of reasons for allowance:
- Prior arts of record do not disclose a method and a system for monitoring a fleet of vehicles in which a vehicle mounted device set forth in claim 1 or 15 sends vehicle position data to a network-based server so that one of more fleet managers can access the network-based server to monitor the real time vehicle position; the vehicle mounted device establishes communication to the network-based server to report the position data to the server; when the communication is disconnected, the vehicle mounted device saves the position data to a memory, and sends the saves data to the server when the connection is reestablished. The vehicle mounted device utilizes short range communication between the second processing module and the wireless telephone on board the vehicle to reduce wiring between the second processing module and the telephone.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Prosecution on the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

A shortened statutory period for reply to this action is set to expire **TWO MONTHS** from the mailing date of this letter.
